

---

# Name that shape!

---

Here are some pictures of **solids**.

Cut out the pictures and stick them in your book. Leave plenty of space below each shape.

Here are the names of the shapes, in the wrong order.

cuboid	hexagonal pyramid	triangular prism	cone	cylinder
--------	----------------------	---------------------	------	----------

Cut out the names and match the names to the shapes. Check with your kind teacher before you stick them in.

---

Here are some names to do with solids. The letters have been mixed up. Copy the mixed up words into your book. Next to them write down the unscrambled words. Make sure that you spell them correctly.

**NET**  
**BUCE**

**ONCE**  
**GEED**

**CAFE**  
**MIRPS**

These are a bit harder:

**EXTREV**  
**ARMYDIP**

**DUBOIC**  
**DLINCERY**

**HESPER**  
**SOMERCITI**

---

## Extension

1. See if Euler's rule works for the shapes on this sheet. What is special about the shapes for which it fails?
2. Your kind teacher has nets for more complicated shapes. Ask if you can try one of these.
